

Rahul Wakle

Software Developer | Full-Stack & Frontend | React, TypeScript, Node.js, AWS

📍 Pune ✉ r.wakle21@gmail.com ☎ +91 9561616635 🐙 Github 🔗 Portfolio 🔗 LinkedIn

SUMMARY

Software Developer with 4 years of experience building scalable SaaS and web applications, with strong expertise in **React.js, TypeScript, JavaScript, Redux Toolkit, Node.js and Express.js**. Experienced in reusable component architecture, React Hooks, REST API integration, state management, performance optimization, and production feature delivery. Strong experience collaborating with product, backend, QA, design, and clients in Agile product environments.

PROFESSIONAL EXPERIENCE

Celoxis Technologies, *Software Developer*

Jan 2025 – Present | Pune, India

- Develop scalable enterprise SaaS features using React.js, TypeScript, Redux Toolkit and Material UI, building reusable UI components and production-ready user workflows.
- Applied React Hooks, memoization, lazy loading, code splitting and render-path optimization to improve frontend performance, Core Web Vitals and maintainability; reduced UI code redundancy by ~30%
- Develop backend features and REST APIs using Node.js and Express.js; troubleshoot production issues and support tickets to improve platform stability.
- Work across requirement gathering, feature design, client demos, technical discussions and release cycles, partnering with product, backend and QA teams in Agile delivery.
- Redesigned the Tuskrr website end-to-end, improving responsive behavior, visual consistency and page-load performance across desktop and mobile

Dreamfuel Technologies (Eximfiles), *Frontend Developer*

Oct 2022 – Nov 2024 | Pune, India

Built responsive React.js dashboards, reusable UI components and business workflows for logistics and export-import management platforms.

- Integrated REST APIs for dynamic data, forms, filters, authentication flows and dashboard experiences, with focus on usability and responsive design.
- Collaborated with designers, backend developers and senior engineers to deliver end-to-end features, resolve UI issues and improve application performance.
- Used Git and GitHub for version control and collaborative development within Agile sprints.

SKILLS

- **Frontend** : — React.js, JavaScript, TypeScript, Redux Toolkit, React Hooks, HTML5, CSS3, Material UI, Bootstrap, Tailwind CSS
- **Backend**: — Node.js, Express.js, RESTful API design, Microservices, integration, authentication flows
- **Databases** : — PostgreSQL, MySQL, MongoDB
- **Cloud** : — AWS (EC2, S3, Lambda, Amplify), CI/CD, Monitoring, Git, Github
- **Practices & Tools** : — System Design, Frontend Architecture, User Onboarding, Agile/Scrum, AI-Assisted Development (Claude, Cursor, ChatGPT, github-copilot)
- **Performance** : — Code Splitting, Lazy Loading, Memoization, Render Optimization, Core Web Vitals, Responsive UI

EDUCATION

M.com, *Nagpur University*

06/2022 | Nagpur, Maharashtra

- **9.3 CGPA**
